EXECUTIVE SUMMARY

Java Backend Developer with experience in Robotics, Machine Learning workflows, and scalable back-end systems. Strong foundations in Core Java, OOP, SQL, and Data Structures. Skilled in building REST APIs, optimizing performance, and writing clean, maintainable code. Seeking an entry-level Java Developer role to contribute to enterprise-grade applications.

TECHNICAL SKILLS

- **Programming:** Java, SQL, JavaScript (Basics)
- **Core Concepts:** OOP, Collections Framework, Exception Handling, Multithreading (Basics), File Handling
- **Backend Development:** JDBC, REST APIs, Node.js (Basic Backend Exposure)
- **Database:** MySQL, MongoDB
- **Problem Solving:** Data Structures & Algorithms (Arrays, Strings, Recursion, Searching, Sorting)
- **Tools:** Git, GitHub, Postman, VS Code, IntelliJ IDEA, Vercel

PROFESSIONAL EXPERIENCE

Associate Analyst — GlobalLogic, Gurgaon, India *Mar 2026 – Present*

- Working on the MDLO project focused on Robotics and Machine Learning applications.
- Designed structured prompts to improve robotic task accuracy and execution efficiency.
- Analyzed human and robotic workflows to create precise, actionable instructions.
- Enhanced task performance by refining prompt logic and reducing ambiguity.
- Collaborated with cross-functional teams to ensure real-world applicability of robotic solutions.

Full-Stack Developer (Backend Focus) — NeonFlake, Hyderabad, India *Mar 2025 – Nov 2025*

- Designed and optimized backend APIs handling 100+ concurrent users.
- Implemented secure authentication and database integration for scalable applications.
- Automated backend workflows reducing manual processing time by 25%.
- Integrated third-party APIs and implemented data validation and exception handling.
- Followed Agile methodology and participated in sprint planning and code reviews.

ACADEMIC & PERSONAL PROJECTS

Chat Application (Backend Logic) *Jan 2025 – Apr 2025*

- Built backend logic for real-time communication and user authentication.
- Implemented JWT-based security and optimized API response time (<200ms).

AI-Based Meal Planner (Backend System) *Aug 2024 – Dec 2024*

- Developed backend APIs for user authentication and data persistence.
- Implemented structured database schema and optimized query performance.

EDUCATION

Chandigarh University, Punjab *Dec 2021 – May 2025*

Bachelor of Engineering in Computer Science and Engineering

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming (Java), Database Management Systems, Operating Systems, Software Engineering

CERTIFICATIONS

- IoT (Internet of Things) – Elite Certificate 2023
- Cybersecurity Virtual Job Simulation — Mastercard & Forage 2025
